

Install Senrio Insight

Appliance

1 Mount

The Senrio Insight appliance comes in a rack-mountable 1U form factor.

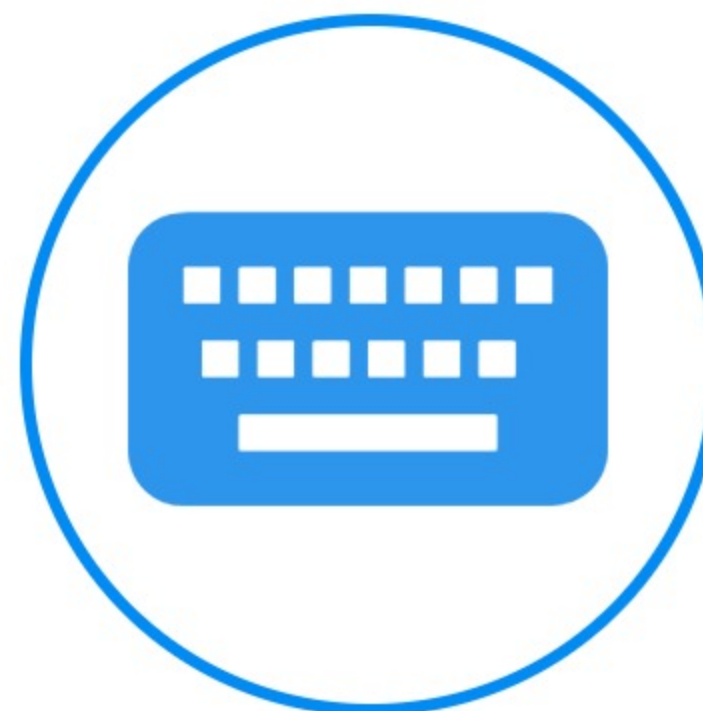

2 Connect

The appliance comes with x2 Ethernet ports; the left connects out to the Internet, the right to a SPAN port on the monitored network.

3 Install

Your welcome email contains a link to your custom browser keys. Import the client.p12 files to your browser.

4 Login

Go to <http://newfrontend/senr.io> A confirmation email will let you know when your account is set up. You can now add sensors and begin to collect data on devices.

5 Start

The initial visualization and identification of your devices should appear in a few minutes and build over time. Search for devices, protocols in use, export device data and more.
